DETAILED ACTION

Claims 1-3 are pending and included in the prosecution.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,562,743 ('743).

US '743 disclosed transdermal drug delivery system to deliver active agents to the skin comprising multiple drug reservoirs separated from each other in a matrix layer (abstract; col.9, lines 57-65). Figure 5 shows that the contact skin is divided by smaller areas by the presence of the reservoirs.

3. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by US 2005/0147654 ('654).

US '654 disclosed transdermal drug delivery system to deliver active agents to the skin comprising multiple channels loaded with drug and acts as reservoirs separated from each other in a matrix layer (abstract; paragraphs 0023, 0039, 0047). Figure 3 shows that the contact skin is divided by smaller areas by the presence of the channels.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US 5,132,115 and US 4,834,978 both teach transdermal devices comprising microreservoirs containing therapeutic agents.
